

## **13Donuts Celebrates Installation of 5,000 Satellite TV Systems**

*13Donuts.com has provided 5,000 homes with the DIRECTV or DISH Network information needed for satellite TV installation.*

(PRWEB) July 21, 2005 -- More than 5,000 people will view clearer pictures with [satellite TV](#) when they hit the power button on their remote controls this month. Thanks to the useful advice given to them by 13Donuts.com, they have ordered satellite television from DIRECTV and DISH Network via authorized DIRECTV & DISH Network Dealers that have partnered with 13 Donuts.

"The editorial staff at 13Donuts.com is proud to surpass the 5,000th installed satellite TV system milestone," says Patrick Grady of 13Donuts.com. "Our goal is to provide information so consumers can make the best decision about which vendor is right for them. To install this many systems in such a short time confirms that we're doing our job well."

13Donuts.com, a Web site that provides comprehensive information about consumer electronics, supports both [DIRECTV](#) and [DISH Network](#) by giving unbiased testimonials of both services and allowing users to choose the satellite system that best suits their needs. Customers are then referred to either an authorized DIRECTV Dealer or an authorized DISH Network Dealer. More than 2,000 people visit the site every day, looking for useful information about home entertainment, such as satellite television systems.

Satellite television gives viewers higher quality programs and more choices than basic cable. Broadcasts offered include the best premium movie channels, sports, family, music, pay-per-view movies and events, local channels, international, adult choices and parental controls.

The Web site recently added details about HDTV programming, which is available through DIRECTV and DISH Network. HDTV allows subscribers to view a variety of additional programming that is 100 percent digital. The site stays updated on the latest promotions, discount packages and rebates, and makes it easy for users to order satellite TV systems either online or by phone. Both providers offer free equipment and installation with purchase.

"Both DIRECTV and DISH Network are great, and the consumer should choose what is best for them -- we're just here to make it obvious that two good choices exist so the consumer can make an informed decision," Grady says.
